

GO-TO-MARKET PLAN · VERSION 1

How we bring *creators* and researchers onto Outlier Desk

A step-by-step plan to recruit the first verified Content Research Experts, win the first paying creators, and grow a marketplace where proven ideas change hands every day.

Prepared for
Save, founder

Date
28 September 2026

Horizon
First 6 months

14.1×

the kind of number we sell

Recruit researchers first, then bring creators to them

Marketplaces die when one side shows up to an empty room. Outlier Desk solves that by recruiting and verifying Filipino Content Research Experts first, then selling creators a small, low-risk first brief backed by visible proof. Every marketing channel below feeds one of those two jobs.

POSITIONING

Proven content ideas, researched by people who find them every day. See the proof first. Pay only for what you unlock.

FIRST CREATORS

Full-time short-form creators, coaches and agencies who already pay an editor.

FIRST RESEARCHERS

Filipino VAs, social media managers and CREs who already find outliers for clients.

Four phases

WEEKS 1-4

Private beta

30 verified researchers, 10 creators matched by hand.

WEEKS 5-8

Founding members

Waitlist opens, content engine starts, first case studies.

WEEKS 9-12

Public launch

Product Hunt, creator communities, referral program.

MONTHS 4-6

Scale what works

Double down on the two best channels. Add retainers.

What success looks like by week 12

METRIC	TARGET	WHY IT MATTERS
Verified researchers	60	Enough supply that every brief gets pitches in its niche
Funded briefs	50	Real demand, not signups
Fill rate (briefs with ≥ 1 unlock)	$\geq 60\%$	The single best health signal for a marketplace
Time to first pitch	< 12 hours	Creators judge us by how fast pitches arrive
Creators who post a second brief within 30 days	$\geq 40\%$	Repeat buying is where the business lives

Lean budget: the plan runs on roughly ₱3,000–₱8,000 a month for tools, plus your time. Paid ads are a small test in Phase 3, not the engine.

What's inside

1. The market and why now	4
2. Positioning and messaging	5
3. Who we target first	6
4. Researcher (supply) playbook	7
5. Creator (demand) playbook	8
6. Content engine: what we post and where	9
7. Scripts and templates	10
8. Referrals and founding-member offers	12
9. Launch week	13
10. Budget	14
11. Metrics and weekly scorecard	15
12. Risks and objections	16
13. The first 30 days, day by day	17

HOW TO USE THIS DOCUMENT

Read pages 2, 7, 8 and 17 first. Those tell you who to talk to this week and what to say. The rest is reference for when a channel starts working and you want to push it harder.

Creators are short on ideas. The Philippines is long on research talent.

CREATORS

207M

content creators worldwide;
about 2M work at it full time

BURNOUT

78%

of creators report burnout in a
2026 survey

OUTSOURCING

72%

of creators who outsource hire a
video editor first

The pressure to post every day is what burns creators out, and "what do I post next?" is the question underneath it. Creators already pay editors. Research is usually the second hire, and today it happens through job boards, DMs and trial-and-error on Fiverr. Nobody sells research the way it should be sold: proof first, idea second.

Why start supply in the Philippines

ONLINE

98.0M

internet users (83.8% of the
population)

TIKTOK REACH

64.0M

adults 18+ reachable with TikTok
ads

FACEBOOK REACH

95.8M

people reachable on Facebook

Filipino freelancers already serve Western creators as VAs, editors and social media managers, usually at \$5–\$15 an hour. Researching outliers is a higher-value version of work many of them already do. Outlier Desk gives them a credential (verification), a portfolio, and a way to be paid per idea instead of per hour.

Our unfair advantage: you work as a CRE yourself. You know the filters, the instruction formats and what creators reject. That lets you judge researcher quality in minutes, which no generic marketplace founder can do.

One promise for each side

FOR CREATORS

"See the proof first. Pay only for the ideas you unlock."

- Every idea arrives with its outlier score: views against the channel's usual views.
- Start with a \$30 brief. No retainers, no hiring process.
- Instructions, not just links: hook, shot list and call to action.
- Unused budget comes back. 72 hours to report a bad idea.

FOR RESEARCHERS

"Get paid for the outliers you find."

- Briefs are already funded before you see them.
- Your idea stays locked until the creator pays.
- Keep 90% of every unlock. Withdraw to GCash, Maya or your bank.
- A verified public profile you can show any client.

Words we use, words we avoid

SAY	DON'T SAY	WHY
Proven ideas, outliers, proof	Viral hacks, guaranteed viral	We sell evidence, not promises. "Guaranteed" invites disputes.
Verified researchers	Cheap VAs, offshore talent	Researchers are the product. Respect them in every sentence.
Unlock, brief, pitch card	Buy content, marketplace listing	Our own words make the model easy to explain.
Pay per idea	Subscription, plan	Low commitment is the main reason creators try us.

Taglines to test

See the proof. Then pay.

Ideas with receipts.

Stop guessing what to post.

Find outliers. Get paid.

Your research, finally priced per idea.

Proof point to earn quickly: your first case study. One creator, one brief, the ideas they filmed, and the views those videos got. Ask for permission to share it before you run the brief.

Narrow on purpose

A marketplace needs density in a few niches before it spreads. Start with the niches where outlier research is easiest to prove and creators already spend money.

Starting niches

Personal finance

Business and coaching

Fitness

Faith and Christian living

Food

Parenting

Pick three for the first eight weeks. Faith content is a natural fit given your ministry communications work, and it's underserved by research tools.

CREATOR PROFILE · "THE BUSY COACH"

Who	Coach or personal brand, 20k–500k followers, posts 5+ short videos a week
Already pays for	An editor, maybe a VA, one or two AI tools
Pain	Runs out of ideas, copies trends too late, burns out
Where they are	X, LinkedIn, Instagram, creator Discords and Skool groups
Trigger to buy	A free audit showing 3 outliers in their niche

CREATOR PROFILE · "THE AGENCY"

Who	Social media agency with 5–30 creator clients
Already pays for	In-house or contract researchers and writers
Pain	Research capacity doesn't scale with new clients
Where they are	LinkedIn, agency-owner communities, referrals
Trigger to buy	Overflow capacity with verified researchers, billed per idea

RESEARCHER PROFILE · "THE EXPERIENCED CRE"

Who	Filipino CRE or SMM with 1+ year finding viral content for clients
Wants	Extra income, more clients, a portfolio that proves skill
Where they are	Facebook groups, TikTok, LinkedIn, referrals from peers
Trigger to join	"Founding researcher" status and paid briefs waiting

RESEARCHER PROFILE · "THE UPSKILLING VA"

Who	General VA or SMM who wants a higher-paying specialty
Wants	A clear skill to learn and a first paid job
Where they are	VA Facebook groups, YouTube tutorials, webinars
Trigger to join	A free "How to find outliers" training that ends with verification

Recruit 30 verified researchers before inviting a single creator

Where to find them

CHANNEL	HOW
Filipino freelancer Facebook groups	Virtual Assistant Philippines, Virtual Assistant Community PH, Philippine Social Media Managers and Freelancers, Online Freelancers PH. Read each group's rules; post value first.
Your own network	CREs, SMMs and VAs you know personally. Ask each for two referrals.
TikTok and Facebook Reels (Taglish)	Short videos: "How I find videos that got 10x views" with a screen recording.
LinkedIn	Search "content researcher Philippines", "viral content researcher". Personal note, no pitch in the first message.
Local schools and orgs	A free workshop for IT and communication students in Naga. Builds the upskilling pipeline.

What to offer

- **Founding Researcher badge** for the first 50 verified, shown on their public profile.
- **Reduced fee for 90 days:** 5% instead of 10% on their first unlocks. (Admin setting; applies to new briefs.)
- **Guaranteed first brief:** you personally post a small paid brief so every founding researcher earns within their first week.
- **Free training:** a 45-minute live session "Finding outliers that actually get unlocked". Record it; it becomes a permanent recruiting asset.

Quality bar

- Approve only researchers whose three portfolio finds are real and above 3x.
- Spot-check the first 5 pitches of every new researcher.
- Remove anyone who fakes views. Trust is the whole product.

Protect your day job: don't recruit coworkers or clients from the agency where you work, and don't reuse its filter system or client data. Check your contract for non-compete and non-solicitation terms before public launch.

Lead with a free audit, sell a \$30 first brief

Creators ignore generic pitches. They respond to proof about their own niche. So the first touch is always something useful: three outliers they could film this week.

The free "3-outlier audit"

1. Pick a creator in a starting niche. Watch their last 10 videos.
2. A founding researcher finds 3 outliers that fit their style (you pay the researcher ₱150–₱300 per audit from your marketing budget).
3. Send the audit as a short Loom or a one-page image: the three outlier scores, the angles, and one full breakdown. Keep the other two locked, the same way the product works.
4. Offer: "Post a \$30 brief and get more like these, from verified researchers, in 24 hours."

COLD OUTREACH, DONE RIGHT

- Average cold email reply rate is about 5%; advanced personalization roughly doubles it (18% vs 9%).
- Follow-ups can lift replies by close to 50%. Send 2–3, spaced 3–5 days, then a week.
- Mention one specific video of theirs in the first line.
- Send Tuesday to Thursday, mid-morning in the creator's time zone.

WEEKLY OUTREACH QUOTA (ONE PERSON)

Creators researched	25
Free audits sent	10
Expected replies (~20%)	2
Expected first briefs	1

Rough planning numbers. Adjust after the first four weeks of real data.

Other creator channels

CHANNEL	PLAY	PHASE
X and LinkedIn (build in public)	Weekly "Outlier of the week" breakdown plus honest founder updates	From week 1
Creator Discords, Skool groups, subreddits	Answer questions about what to post. Share audits when asked. Follow each community's promotion rules.	From week 3
Agencies	Offer overflow research with a per-idea price. One agency can bring 10 creators.	From week 5
Creator newsletters and podcasts	Guest breakdowns first; small sponsorships only after fill rate is above 60%	Months 4–6

Our marketing is the product, in public

Outlier Desk sells outlier research, so the best marketing is showing outlier research. Every post teaches something useful and quietly demonstrates what a pitch card looks like.

Weekly rhythm

DAY	POST	WHERE
Monday	Outlier of the week: one video, its score, why it worked	X thread, LinkedIn, TikTok/Reels
Tuesday	Researcher spotlight (with permission)	Facebook, LinkedIn
Wednesday	"How to find outliers" tip in Taglish	TikTok, Facebook Reels, researcher groups
Thursday	Niche breakdown: 5 outlier formats in personal finance (or another niche)	X, LinkedIn, blog page
Friday	Founder update: numbers, lessons, what shipped	X, LinkedIn
Weekly	Email to the waitlist: best outlier + one researcher + one product update	Email

Ten post ideas with hooks

1. "This 38-second video got 14× its channel's usual views. Here's the structure."
2. "I tracked every outlier in personal finance TikTok this week. 3 formats keep winning."
3. "Your views aren't low. Your ideas are unproven. Here's the difference."
4. "Paano maghanap ng video na 10× ang views? Step-by-step for VAs."
5. "What a creator sees before paying for an idea (and why that builds trust)."
6. "We verified our first 30 researchers. What we rejected and why."
7. "The median trick: how to tell an outlier from a big channel."
8. "Creators paid \$8 per idea this week. Here's what they unlocked."
9. "From VA to content researcher: how Maria made her first ₱10,000 on Outlier Desk." (real story only)
10. "We refund unused budget. Here's the math on a \$40 brief."

Keep it honest: only use real numbers and real people who agreed to be featured. Fabricated testimonials destroy trust in a marketplace built on proof.

Copy, personalize, send

Cold email to a creator

Subject: 3 outliers for {{channel}} this week

Hi {{first name}},

Your "{{specific video}}" did {{x}}× your usual views. The angle, {{one-line reason}}, keeps showing up in other {{niche}} channels right now.

We pulled 3 more videos in your niche that beat their channel's median by 10× or more. Here's one fully broken down: {{link}}. The other two are waiting if you want them.

I run Outlier Desk: verified researchers pitch proven ideas, you see the proof first, and you pay only for the ones you unlock (from \$5 an idea).

Want me to set up a \$30 brief so you can try it this week?

Save

Founder, Outlier Desk

Follow-up 1 (day 4)

Hi {{first name}}, bumping this in case it got buried. The breakdown link is still live: {{link}}. Happy to send the other two outliers if they're useful, no strings.

Follow-up 2 (day 11)

Last note from me. If research is covered for now, no worries. If you ever want a batch of proven ideas without hiring anyone, a brief takes 2 minutes: {{signup link}}.

X / Instagram DM to a creator

Loved "{{video}}". The {{hook type}} hook is why it beat your median. I found 3 more outliers in {{niche}} using the same pattern. Want them? Free, no pitch attached.

Facebook group post for researchers (Taglish)

Para sa mga VA, SMM at content researchers 🙌

Naghahanap kami ng 30 Founding Researchers para sa Outlier Desk, isang marketplace kung saan nagpo-post ang mga creators ng "brief" (paid na agad) at ikaw ang magpi-pitch ng proven content ideas.

- ✓ Ikaw ang may hawak ng idea hanggang magbayad ang creator
- ✓ 90% ng bawat unlock ay sa'yo (5% lang ang fee sa unang 90 araw para sa Founding Researchers)
- ✓ Withdraw sa GCash, Maya o bank

Kailangan: 3 halimbawa ng videos na nakita mo na may 3× or higher views kumpara sa usual ng channel, at valid ID para sa verification.

Comment "OUTLIER" o i-message ako para sa invite link. May free training din kami sa Sabado.

LinkedIn note to an agency owner

Hi {{name}}, I saw {{agency}} manages short-form for {{type of clients}}. When research capacity runs short, we have verified content researchers who pitch outliers with the proof visible, billed per idea, no hiring. Open to a 15-minute call to see if overflow research would help your team?

Referral message researchers can send

I've been getting paid per idea on Outlier Desk for finding viral videos for creators. They're recruiting verified researchers. If you already do content research, sign up with my link: {{referral link}}

Case study request (after a creator's first unlocked ideas)

Hi {{name}}, glad the ideas were useful. If any of them perform well once you post, could we share the before/after numbers as a short case study? We'd send it to you for approval first and can leave your name out if you prefer.

Let each side recruit the next

Big marketplaces reward both the person who refers and the person who joins, and they pay out only after a real transaction. We follow the same rule so referral money never pays for empty signups.

MARKETPLACE	WHAT THEY OFFER
Fiverr	Referrer earns up to 10% of the referred buyer's first order (max \$100); new buyer gets a discount
Airbnb	Guest referral credit of roughly \$25–\$65 depending on region; host bonus after first booking
Uber	Rider credits of \$5–\$20; driver sign-up bonuses of \$200–\$1,000+ where supply is short
Upwork	Client platform credits; freelancer affiliate commissions when referred pros complete work

Proposed Outlier Desk program

RESEARCHER REFERS RESEARCHER

₱200 to both after the new researcher's first unlock. Cap of 10 referrals per person in Phase 2.

ANYONE REFERS A CREATOR

Creator gets \$10 off their first brief. Referrer gets \$10 after that brief is funded.

Needs building before Phase 3: referral codes, credit balances and payout of referral bonuses aren't in the app yet. Until then, track referrals by hand in a spreadsheet and pay bonuses manually.

Founding member perks (first 8 weeks)

- **Founding Creators** (first 25): you personally set up their first brief on a call, and they get the first 3 unlocks refunded if none are usable.
- **Founding Researchers** (first 50): badge, reduced fee for 90 days, first paid brief guaranteed.
- Both: a private group chat with you for feedback. Their feedback shapes the roadmap, and they'll feel it.

Launch once the marketplace already works

A public launch only helps if visitors find pitches arriving fast. Launch when fill rate is above 50% and time to first pitch is under 24 hours.

Four weeks before launch

WEEK	DO THIS
-4	Post about the problem (creator burnout, guessing what to post) on X and LinkedIn without mentioning the product
-3	Share behind-the-scenes: how verification works, first researcher stories
-2	Open the waitlist on the homepage (already built) and post the signup link everywhere
-1	Message your closest 50 supporters personally with the launch date

Launch guides for 2026 suggest having roughly 500 engaged followers and 200–300 email subscribers before a Product Hunt launch.

Launch day (Product Hunt)

- **12:01 AM Pacific (3:01 PM Manila):** go live with a clear founder comment: the problem, the proof-first model, and an offer for PH visitors.
- Reply to every comment within minutes for the first six hours. Comment quality matters more than upvote count.
- Email the waitlist in the morning Pacific time; post on X and LinkedIn at noon with a progress update.

Stagger other launches

Same day: Hacker News "Show HN"

Within 48h: Indie Hackers

Day 5: relevant subreddits (follow rules)

Ongoing: startup directories

After launch (days 1–30)

- Days 1–7: personally message every new signup.
- Days 8–14: small group calls with active users.
- Days 15–21: convert engaged creators with a launch offer.
- Days 22–30: collect testimonials and case studies (real ones, with permission).

Spend time before money

ITEM	MONTHLY	NOTES
Domain name	~₱70	About ₱800 a year for a .com
Hosting (Vercel)	₱0 → ~₱1,200	Free while testing; paid plan (about \$20/month) when you need 15-minute scheduled jobs and more traffic
Database (Supabase)	₱0 → ~₱1,500	Free while testing; paid plan (about \$25/month) adds daily backups and removes project pausing
Email (Resend)	₱0	Free tier covers early volume
Free audits for creators	₱1,500– ₱3,000	10 audits a month at ₱150–₱300 paid to researchers
Guaranteed first briefs for founding researchers	₱1,000– ₱2,500	Only during Phase 1–2
Paid test (Phase 3 only)	₱2,000– ₱5,000	Boost the best-performing researcher-recruiting video in the Philippines
Total, Phases 1–2	₱3,000– ₱8,000	

Tool prices are approximate and change often. Check each provider's pricing page before paying.

Where the money should go first

Money spent paying researchers is marketing twice: it creates a creator lead and a researcher who's already earned on the platform.

One number to watch: paid unlocks per week

Unlocks mean a creator trusted a pitch enough to pay for it and a researcher earned.

Everything else explains why that number went up or down. The admin overview in the app already shows fill rate, revenue and funded briefs.

Weekly scorecard

METRIC	WEEK 4	WEEK 8	WEEK 12
Verified researchers	30	45	60
Creators with a funded brief	10	25	40
Funded briefs (cumulative)	12	30	50
Paid unlocks per week	10	30	60
Fill rate	50%	55%	60%+
Median time to first pitch	24h	16h	< 12h
Dispute rate	< 5%	< 4%	< 3%
Creators posting a 2nd brief in 30 days	–	30%	40%

How to read it

- **Fill rate low:** not enough researchers in that niche. Recruit supply there before selling more briefs.
- **Many pitches, few unlocks:** pitch quality or brief clarity. Review rejected pitches with the researcher.
- **Disputes rising:** tighten verification and spot-checks right away.
- **No second briefs:** call three creators and ask why. That conversation is worth more than any dashboard.

What people will say, and what we answer

OBJECTION	ANSWER
"I can just use an AI outlier tool."	Tools show thousands of outliers. Our researchers pick the few that fit your style and write the hook, shot list and CTA. You pay only for the ones you want.
"What if the idea is bad?"	You see the proof before paying. If an unlocked idea isn't what the card showed, you have 72 hours to dispute.
"Why not hire a researcher directly?"	No hiring, no retainer, no management. Try five researchers for the cost of one hour of a US strategist.
Researcher: "Will creators steal my idea?"	They can't see the source, hook or instructions until they pay. Contact details are hidden in chat.
Researcher: "Is this legit?"	Briefs are paid before you see them. Payouts go to GCash, Maya or your bank. Show real payout screenshots (with permission).

Business risks

RISK	WHAT MARKETING DOES ABOUT IT
Empty marketplace at launch	Supply first, three niches, hand-matched briefs, guaranteed first briefs
Deals moving off-platform	Keep fees fair, promote escrow and disputes as protection, never encourage outside payment
Low-quality researchers	Strict verification, spot checks, public unlock rates
Conflict with your current job	Check your contract; don't recruit your agency's clients or staff
Legal and payments	Register the business (DTI/SEC, BIR) and have a lawyer review the terms before taking real money

Your checklist

Week 1 · Set up

- ☐ Test the live app end to end with a second tester (creator + researcher)
- ☐ Pick 3 starting niches
- ☐ Write the first "Outlier of the week" post
- ☐ List 50 researchers you can personally invite
- ☐ Join and read the rules of 5 Filipino freelancer groups

Week 2 · Researchers

- ☐ Invite 50 researchers; aim for 20 signups
- ☐ Run the first free training (record it)
- ☐ Approve verifications within 24 hours
- ☐ Post 2 small paid briefs yourself so founders earn
- ☐ Post the Taglish group message in 2 groups

Week 3 · Creators

- ☐ Research 25 creators in your niches
- ☐ Send 10 free 3-outlier audits
- ☐ Follow up on day 4 and day 11
- ☐ Set up the first 3 creator briefs on a call
- ☐ Ask one creator for a case study

Week 4 · Learn and repeat

- ☐ Fill in the weekly scorecard
- ☐ Call 3 creators and 3 researchers for feedback
- ☐ Fix the top 3 issues from the Feedback inbox
- ☐ Recruit 10 more researchers in the weakest niche
- ☐ Decide which two channels get more time in month 2

THE RULE FOR EVERY WEEK

Talk to at least five researchers and five creators. The marketplace grows at the speed of those conversations.

Where the numbers come from

1. DataReportal, Digital 2026: The Philippines — <https://datareportal.com/reports/digital-2026-philippines>
2. The Creator Economy, 78 percent of creators report burnout (2026) — <https://thecreatoreconomy.com/post/creator-burnout-78-percent-mental-health-2026>
3. SQ Magazine, Creator economy statistics 2026 (SignalFire estimate of full-time creators) — <https://sqmagazine.co.uk/creator-economy-statistics/>
4. DemandSage, Creator economy statistics (207M creators) — <https://www.demandsage.com/creator-economy-statistics/>
5. The Creator's Assistant, 2025 Vibely creator survey (72% hire an editor first) — <https://www.thecreatorsassistant.com/how-to-hire-youtube-video-editor>
